

## **Aligned Telehealth Reaches Milestone of over 325,000 Consultations**

Calabasas, (CA) - Jan. 30, 2018 – Aligned TeleHealth is one of the nation’s leading providers of behavioral healthcare solutions with over 150 sites in 13 states ranging from emergency and acute settings to outpatient, correctional, and long-term-care. The company has just reached a milestone of over 325,000 consultations since 2013. Over 270,000 of those encounters were in the acute and long term care settings, and over 56,000 were tele-based consults. “We pride ourselves on being a behavioral health solutions-based company, delivering the highest quality of care while improving access to mental health services. The majority of tele patients are seen within 60 minutes of the consult” states Dan Castillo, President and COO.

The group has been in expansion mode, recently signing an enterprise deal with Dignity Health in December and has partnered with a national correctional services firm to meet the high demands of mental health to inmates.

According to the company’s CEO, Nitin Nanda, MD, “Aligned Telehealth’s success is built on strong clinical expertise, business intelligence, and a proven ability to support the client’s needs while putting the patients at the center of care.”

### **About Aligned Telehealth**

Aligned Telehealth, Inc. provides on-site and telemedicine behavioral health solutions to hospitals, long-term care facilities, outpatient clinics, and correctional programs. In addition, Aligned provides customized programs for ACOs and health plans tailored towards population health that promote the right care being delivered in the most cost effective setting in a manner that puts the patient at the center of care.
